### When Traditional Medicine Fails, Your Guide to Mold Toxins

Paperback – October 3, 2006

by James Schaller (Author), Gary Rosen (Author)

4.6 (28)

In 2004, the EPA warned physicians to be on the lookout for both respiratory and neurological symptoms from mold contaminated schools and homes. The latest medical science shows 1 in 4 children are sensitive to low levels of mold toxins. Is your child one of these? Now a "top gun" physician & medical innovator teams up with an accomplished scientist & master builder to clearly explain how even small amounts of hidden indoor mold-produced biotoxins can subtly impact youth behavior, emotions, health and learning. In their easy-to-read prophetic book, they offer solutions based on the latest medical and scientific research that work for both bodies and buildings. . .restoring quality of life to children and parents. Similar to an oil change for your car, our mold toxin Detox program cleans away contaminants in internal fluids in a way that quickly restores children, adolescents, and even adults to health and contentment. Gary Rosen, Ph.D., C.I.E. - A biochemist, trained under a Nobel Prize winner, who has authored numerous advanced text books on mold. Dr. Rosen has performed over 1000 mold inspections. James Schaller, M.D., C.M.R. - A prolific clinical and research physician publishing in 16 areas of medicine, with three books on mold illness.
